CODE REVIEW A4

Authors: Ankita, Ushang, Xia

Reviewer: Manthan Thakar - Vineet Trivedi - Sharad Boni

10/16/2017

Note: The code review is for commit id `33cb366a3b2a064ee02856fb935645e4c434af7c` (the last commit ID before 2PM). Some of the points written here may or may not have been addressed by the team in any later commits.
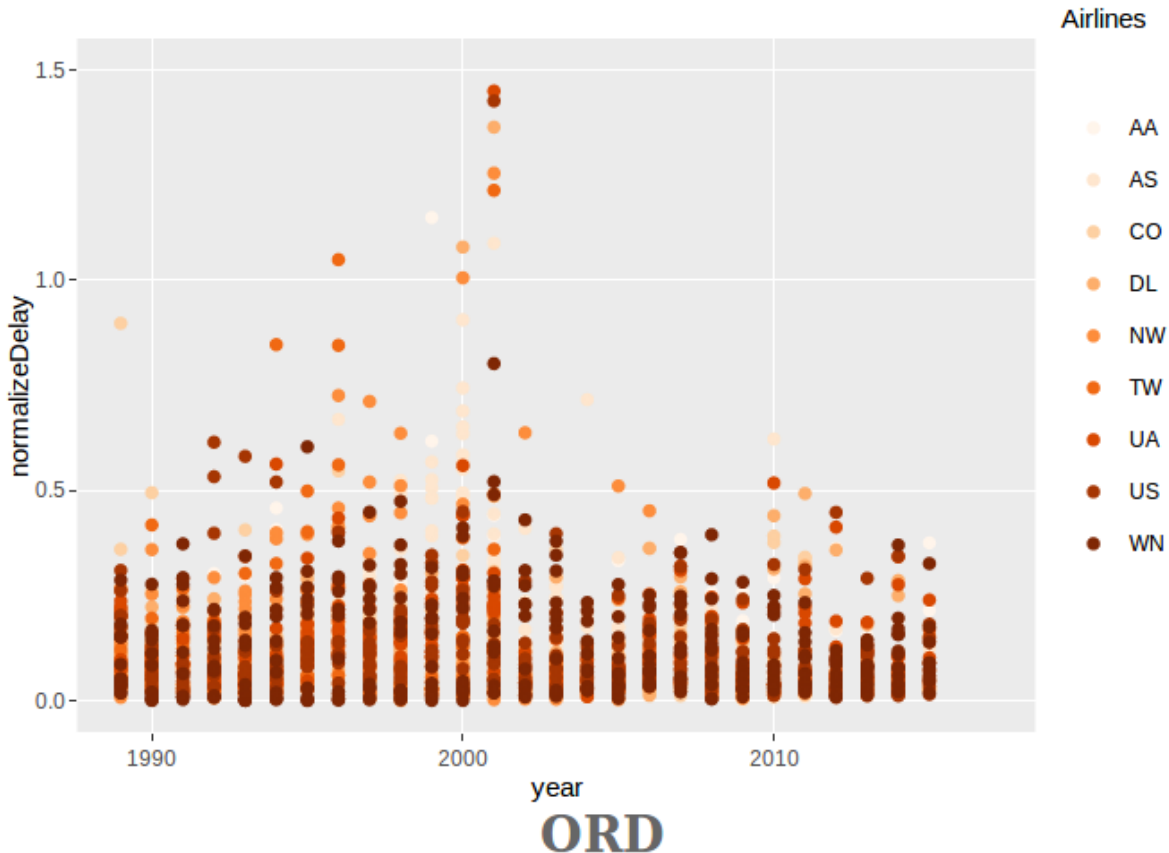

Building and Running the code

- Executed successfully.

Code

- Code was clear, concise, readable, well structured, designed and commented.

Report

- The following graph has a color gradient, darker the color higher the frequency.
- At the first glance, it is difficult to make sense of the overall graph because one cannot clearly distinguish between the airlines:

- Even after isolating an airline, the trend of the lightest airline is difficult to see:
